

From Amani United President Bro. RiceBey:

Good day residents of Amani, friends and partners,

We'd like to take a moment to address growing concerns about the Coronavirus or COVID-19.

The World Health Organization has declared the virus a pandemic, and Wisconsin Governor Tony Evers has declared a state of emergency. But there are things we can do in Amani to slow or stop the spread of the virus. Wash your hands, cover when you cough or sneeze, avoid touching your face and stay home if you or someone in your household has displayed symptoms. Symptoms include runny nose, sore throat, cough and fever. The great majority of infections will be mild, though the virus can be dangerous for the elderly or people with underlying health conditions, so watch out for family and community members in these populations.

As of right now we are holding all of our meetings and programs as scheduled, but we are closely monitoring this changing situation. If a COVID-19 outbreak happens in Milwaukee, we will re-evaluate and update accordingly. In the meantime, visit the CDC at www.cdc.gov or the Wisconsin Department of Health Services at www.dhs.wisconsin.gov/outbreaks for the most up-to-date information.

If you would like to get in contact with President Bro. RiceBey, contact him at 414.444.9930 or amaniunitedpresident@gmail.com.
